Dear Mr. Burns,

Your input will be considered by BABCNC as it considered its recommendation on the proposed gating project.

A Categorical Exemption from environmental review has been proposed for this project (ENV-2020-2854-CE). That may or may not be the appropriate level of review, but it does represent the proposed method of compliance with the California Environmental Quality Act for this project.

Sincerely,  
Travis Longcore

Gentlemen: An environmental impact report, so far as I know, has not been made, hearings held or published for this traffic compounding proposal. The project thereby violates the California Environmental Quality Act. I object to the proposal on those grounds.
