Bel Air Power Upgrade Project

LADWP is working hard to make important electric infrastructure improvements in the Bel Air area to markedly improve power reliability. We appreciate the community's patience and understanding as we complete critical infrastructure upgrades.

Project Description

LADWP will install additional underground power lines to upgrade infrastructure and improve reliability for the Bel Air, Beverly Crest, Westwood, and Holmby Hills communities. These areas have experienced significant reliability issues due to high demand, which has resulted in an overload on the system.

Four new underground circuits will be installed to relieve the overloaded circuits. A total of 27,138 feet of new cable will be installed. See map on page 2.

Construction will involve excavating and trenching to install new conduit and cable. Traffic will be impacted and flaggers will be on-site to assist with traffic flow.

Parking will be impacted and Temporary No Parking/Tow Away signs will be posted as needed.

In order to minimize traffic impact, construction will begin in 2019 on Sunset Blvd. Once the Sunset Blvd portions are complete, construction will move to several side streets in 2020.

See map on page 2.

2019 Construction:

Sunset Blvd at Bel Air Rd and Sunset Blvd at Bellagio Rd

Construction will begin in June 2019 in two different areas: Sunset Blvd by Bellagio Rd and Sunset Blvd by Bel Air Rd. Two traffic lanes will be closed to accommodate construction. However, two lanes will remain open at all times for east and westbound traffic. LADWP anticipates that construction on Sunset Blvd will be completed by May 2020.

2020 Construction:

Bellagio Rd, Bellagio Pl, Chalon Rd, Bel Air Rd, and Beverly Glen Blvd

Construction will begin on these side streets in 2020. Residents will be notified with a construction notice once the schedule is finalized. **Please note that due to the narrow width of Bellagio Rd, a road closure will be required. Access to Bellagio Rd will remain open for local residents, deliveries, and emergency vehicles.** A detour route will be posted in advance and message signs will be set up on impacted streets.
