Hi Irene,

I won't be able to make it this month but I'll continue to review your agendas for items that might need my attention and please let me know when you'd like me to try to attend.

In regard to the water on Laurel Canyon, I'm working on getting this referred to the proper engineering group for assessment of the groundwater situation. At this point, I'm checking off some boxes like asking Street Services to agree that this is groundwater and not runoff, and then the engineers will take a look at it.

Can you show me some examples of these "shield" fences? We may be able to pursue enforcement of the Specific Plan design standards, if they're being violated.

I'll talk with our team about the Mulholland/Nicada site again and we can try to see what solutions might be available.

Best,

Sidney Liss (he/him/his)

Field Deputy

Direct: 213-573-3224
